Who Should Serve on French Mill

Nearly any foodservice operation can benefit from Urban Mill's gorgeous coupe style, organic texture and the cost savings from using long-lasting melamine:

- Casual and fast casual restaurants
- Hotel dining
- Patio, outdoor and rooftop dining
- Catering
- Employee dining

Who Should NOT Serve on French Mill

French Mill's style is perfect for operations seeking an artisanal farm-to-table style. However, it's not a fit everywhere. High-volume dining halls and operations will be better served with non-decaled patterns.

And like all melamine, French Mill has a few areas where porcelain naturally performs better. In these cases, we recommend using either a mix of porcelain and melamine or porcelain only.

- Plated entrées requiring a steak knife
- Plated entrées requiring oven or salamander finishing
- As always, melamine should not be microwaved

See Corona's **Artisan Beige** and **Artisan Gray** collections for similarly styled porcelain.
