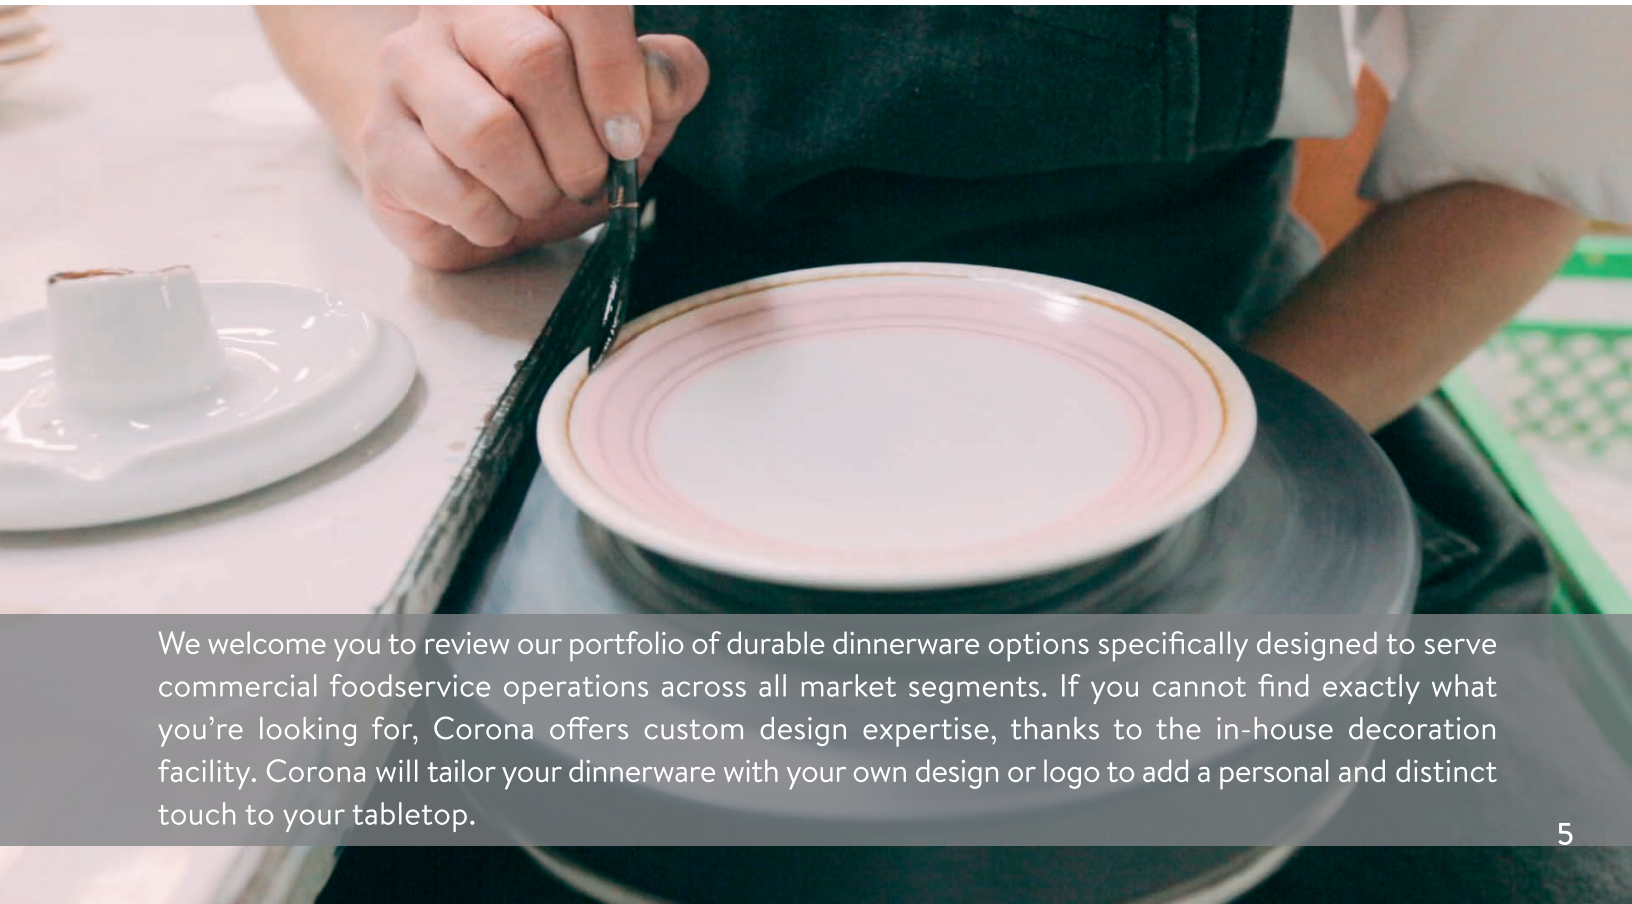
ABOUT CORONA

Corona Hotelware Corporation is part of the Corona Group, Echavarria's family-owned and operated company, who is a ceramic manufacturing leader across several different industries. Corona Group is globally known for its commitment to high quality and durable products. All products are proudly designed and manufactured in Colombia, South America.

Corona has been manufacturing high quality ceramic dinnerware since 1881. The Corona factory ranks among the largest tableware facilities in the world with over 330,000 sq. ft. with production capacity of 6 million dinnerware units per month. Corona has been recognized for consistently investing in state-of-the-art technology, including pad printing, high pressure casting, solid colors, wide/wash bands, in-glaze decals, CAD software, applied across its total portfolio.

Corona's tableware has been developed to meet the most demanding standards of commercial foodservice operations offering unrivaled durability and strength in addition to beautiful design. Most Corona products are manufactured with high alumina content and fired at high temperatures to provide industry leading durability. Thanks to the free trade agreement between Colombia and USA, Corona portfolio does not require extra duties or quotas which aid in making Corona porcelain the most affordable ceramic tableware available in its class.

Corona quality is further certified under the ISO9001: 2000 standard. They are members of the BASC Organization, which is recognized as a global model of international private-public sector cooperation to promote normalization and standardization of procedures within the supply chain focused on optimal quality, safety and sustainability.



We welcome you to review our portfolio of durable dinnerware options specifically designed to serve commercial foodservice operations across all market segments. If you cannot find exactly what you're looking for, Corona offers custom design expertise, thanks to the in-house decoration facility. Corona will tailor your dinnerware with your own design or logo to add a personal and distinct touch to your tabletop.

FEATURES

Microwave & dishwasher safe

Thermal shock resistant

Oven safe
Max 380° F-10min

Made in Colombia

*Stackability

*Chip resistant
5 year edge chip warranty on round products

Lead and cadmium free

*Scratch resistant

Ph: 888 298 4249

CALYPSO

Calypso's vibrantly colored hand-painted artisanal rims create a bright and energetic atmosphere. Available in four mix-and-match color themes, this durable, fully vitrified collection brings a splash of color to every tabletop it touches.

GOTAS

Corona presents its
new line GOTAS.
This line was inspired by
drops of water and the
soothing ripples they create.
These shapes were designed
by Spanish
designer Ximo Roca.

14 innovative pieces. Bright
white porcelain.
Pieces designed to inspire
customers and enhance
the table .

ASIA

In this collection, flavors and exotic preparations find the ideal companion. In bright white porcelain, Asia has its inspiration in the magic of the East, achieving a perfect balance between simplicity and elegance. Square shapes break with traditional designs. Asia´s bowls and platters stand out as the perfect complements for the table.

Complete rim design plus logo in the center of the plate

Logo with one band

logo with broken band

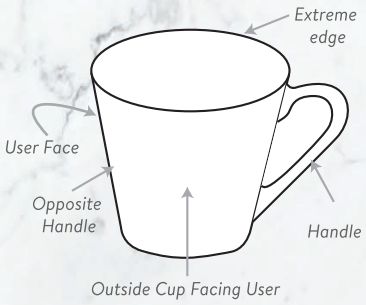
Logo

Logo on plating area

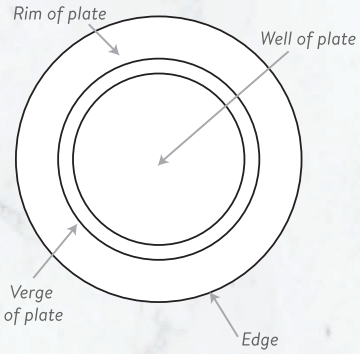
Logo with two bands

We will tailor your dinnerware with your own design or logo to add a personal touch to your tabletop. Designs will be kept at our factory to guarantee flexibility on reorders.

MUG AND CUP



PLATE



Custom Decoration

Minimum order quantity for custom logo/decal design is 18 dozens or 96 each each rounded to the nearest case pack.

Customer:

•Must supply a logo/design in a Photoshop or Illustrator file (300 DPI)

• Provide the product SKU and the desired location for the logo.

• Provide timely approvals for the artwork proofs and samples.

Corona:

• JPG proof will be provided within 5 business days.

• When JPG is approved, a physical prototype, Photocal, will be mailed for approval within 8 business days.

•We use a transparent paper applied to the chosen dinnerware piece for approval of logo positioning and proportion. Colors will be represented as accurately as the printing process allows. The ceramic sample will not be fired.

• When the Photocal is approved, the fired production sample will be mailed for the color approval. The first sample is free of charge. Lead time is 25 days.

• To place an order, customer must sign the approval sticker attached to the fired production sample and mail the signed sample with the purchase order to G.E.T. at the address below:

G.E.T. /Custom Logo Department
7401 Security Way, Suite 200
Jersey Village, TX 77040, USA

Inglaze decoration process:

For all commercially used products, we recommend the inglaze decorating process. This is when the decal (logo or design) is applied inside the glaze which makes it resistant to wear and tear.

Unless discussed in advance, the inglaze process is used on all Corona custom projects. Gold applied with the inglaze decorating process is microwave and dishwasher safe.

Note:

• Please accept the 5% tolerance for quantities purchased for products with custom logo or decal design.

• Any modification of the logo will require a new set of approvals and may affect your final product delivery date.

• When seeking a decorated item that contains a logo or symbol that is the property of an institution, organization, or corporation other than the customer's, a letter of authorization is required from the owner of the logo authorizing Corona to produce and sell its items.

• Once production starts, custom orders cannot be canceled, changed or modified. Custom orders cannot be returned or refunded.

For high volume customers interested in unique custom shapes, sizes or colors, please contact G.E.T. at corona@get-melamine.com for information on mold cost requirements, minimum order quantities and lead times.

DINNERWARE USER GUIDE

Recommendations and user guide

Manual Wash
It's done using three sinks: Dinnerware is submerged in water with soap, then rinsed in regular water. The faucet must be covered to avoid mechanical collisions with the dinnerware.

Manual Process
-Remove food: Remove solid residue from plate. This must be done by hand with gloves or with a plastic spatula.

-Pre-wash: Rinse the pieces in warm water to remove any residue left from the first process. This must be done only with dinnerware and cannot be mixed with any metallic elements

-Detergent wash: Completely submerge the dinnerware in warm water with soap. Soft sponges should be used.

-Rinse: The dinnerware is rinsed with hot water to remove the detergent from the pieces. This process must be done using clean and fresh water.

AUTOMATIC WASH

The washing process is done in a dishwasher which does all the process of rinsing and soaping in different cycles.

Automatic Process
- Remove food: Remove solid residue from plate.

- This must be done by hand with gloves or with a plastic spatula.

- Pre–wash: Rinse the pieces in warm water to remove any residue left from the first process. This must be done only with dinnerware and cannot be mixed with any metallic elements.

- Detergent wash: Machine cycle where the dinnerwa-re is exposed to water and soap at a temperature of 149°F (65°C).

-Rinse: Machine cycle with fresh water at 179°F (82°C) with additives that can be shinning or drying agents.

DRYING PROCESS

If dinnerware is in a rotation, it can be left to dry at ambient temperatures. If dinnerware is going to be stored, it should be dried with a cloth to avoid water marks.

THE DETERGENT

Manual Wash
Should be liquid to avoid scratching the dinnerware. It should also be neutral to avoid drying out the skin of the washer and to protect the glaze of the dinnerware.

Mechanical Wash

Should be liquid to avoid scratching the dinnerware. In the rinse cycle, shining, rinsing and drying agent can be used to improve the shine in the dinnerware and to reduce the drying time.

STORAGE

Dinnerware must be stored separately from flatware, drinkware and cutlery.

Stack according to shapes and sizes.
When dinnerware is stored in metallic divisions, it is recommended to protect the pieces with a cloth to avoid contact between the metal and the porcelain.
Do not store wet or moist dinnerware.

RECOMMENDATIONS FOR THE REMOVAL OF DINNERWARE STAINS.

-Rust and metal scratches.

Produced by inappropriate washing, friction between pieces, contact with metallic utensils or the use of soft metal flatware.

To prepare the solution that helps soften stains, use one tablespoon of baking soda for every liter of water. Boil the solution and introduce the stained dinnerware for 10 to 20 minutes, depending on the size and visibility of the stains.

This process should be done in a stainless-steel container. Please avoid aluminum containers.

When the dinnerware is removed, rinse well. If some of the stains remain, use an abrasive powder detergent and scrub with a soft sponge.
This last procedure should only be done in white glaze and by no means should be done on decorations.

-Coffee, tea, chocolate or cocoa stain.

These stains occur when the dinnerware is not washed for long periods of time after using.

It is recommended to introduce the stained dinnerware to water with 4% chloride for 20 minutes. Rinse and notice the difference.

KEEP IN MIND

To avoid breakage.

-Separate the dinnerware from flatware, drinkware and other elements.

-Trays must be balanced and never overload.

-Use comfortable and safe footwear.

-Avoid irregular and slippery surfaces.

-Always indicate wet floors or floors that are being cleaned with appropiate wet floor signage.

-Avoid friction between pieces to reduce scratches.

-To stack use these maximums.
- o 15 pieces for plates larger than 8 ½ in
- o 5 pieces for plates smaller than 8 in
- o 3 for mugs and cups.

-Remove all solid residue from plates before cleaning. This must be done by hand or with a plastic spatula, never with metallic elements.

-Avoid leaving coffee or chocolate residues for more than 24 hours.

-Faucets and knobs must be covered to avoid mechanical collisions with the dinnerware.

-Avoid storing moist or wet pieces.
